Instructions to authors

Aims and scope

Journal of Rock Mechanics and Geotechnical Engineering (JRMGE) is a bimonthly journal focused on the latest research achievements in rock mechanics and geotechnical engineering, and provides an opportunity for colleagues from all over the world to understand the current developments in rock mechanics and geotechnical engineering.

The scope of articles includes new theories, new technologies, new methods and experience, in-situ and laboratory tests, new developments, and timely reviews on selected subjects in rock mechanics and geotechnical engineering in China and overseas. Articles should contain original data and facts that support the conclusions. Manuscripts should conform to the format guidelines set out below.

Submission of papers

From 2013, JRMGE starts cooperation with Elsevier. The entire submission and review process for the JRMGE is handled electronically, which shortens publication time. All papers should be submitted through <http://ees.elsevier.com/jrmge> or <http://www.rockgeotech.org>. All correspondence between editor and author is performed by e-mail, and paper copies are not required. Authors submit their articles online simply by registering, logging-in, and submitting.

Submission language: English (link to the Oxford English Dictionary <http://dictionary.oed.com/entrance.dtl>)

Corresponding author: Clearly indicate who is willing to handle correspondence at all stages of refereeing and publication, also post-publication. Ensure that telephone and fax numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address. Full postal addresses must be given for all co-authors. Please consult a recent journal paper for style if possible.

Original material: Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the publisher.

Upon acceptance of an article, authors will be asked to sign a "Journal Publishing Agreement" (for more information on this and copyright

see <http://www.rockgeotech.org>). Acceptance of the agreement will ensure the widest possible dissemination of information. An e-mail (or letter) will be sent to the corresponding author confirming receipt of the manuscript together with a "Journal Publishing Agreement" form or a link to the online version of this agreement.

If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article.

Editor's requirements

All submissions will be reviewed by referees selected by the editorial board. The decision of acceptance or rejection of a manuscript is made by the editorial board based on the referees' reports. The entire review process may take 60 to 90 days, and the editorial office will inform the author(s) of the decision as soon as the process is completed. If the editorial board fails to make a decision within 90 days, it is up to author(s) to decide whether they would withdraw their paper and submit it elsewhere. On acceptance, contributions are subject to editorial amendment to suit house style. When a manuscript is returned for revision prior to final acceptance, the revised version must be submitted within two months after the author's receipt of the referees' reports. Papers essentially of an advertising nature will not be accepted.

The editor reserves the right to return, prior to refereeing, any manuscripts which do not conform to the instructions for manuscript preparation and artwork instruction, as well as papers which do not fit the scope of the journal.

Author benefits

The first-named author or the corresponding author will receive one free copy of the current issue, and have one-year free access to the electronic journal.

The journal is abstracted or indexed in Chinese National Knowledge Infrastructure (CNKI), Wanfang Data Information Site, and other Information Sites.

Copyrights

The author must sign a Copyright Transfer Agreement, transferring copyright of the article from the author to the owner of the journal before the paper can be published.
